

SYSPRO – Proven Reliability:

SYSPRO ERP software is a fully integrated business solution that gives firms in a variety of industries complete control over the planning and management of all facets of their operations, including accounting, manufacturing and distribution. With access to easy-to-view, real-time information, a business can leverage SYSPRO software to respond rapidly to changing circumstances, react quickly to customer demands, reduce operating costs through streamlined processes and workflow automation and outpace the competition. Because the SYSPRO ERP system can extend the enterprise with sophisticated CRM, APS and e-commerce functionality, a company can easily extend control to its entire supply chain.

The power of SYSPRO software is further enhanced via 3-tier client/server setup and SYSPRO e.net solutions, component-based framework that provides a standard way of directly accessing the business functionality within the SYSPRO solution while maintaining the software's built-in business rules and security. In addition to enabling Web services, SYSPRO e.net solutions also facilitates the integration of other best-of-breed applications with SYSPRO software.

The modular nature of the SYSPRO ERP solution allows a firm to select those functions needed to increase operational control and effectiveness. SYSPRO software is enhanced and upgraded on an ongoing basis. The software is available in multiple languages and supports the euro. With a foundation of leading-edge technology, SYSPRO software enables a business to reap the rewards of a more efficient operation.

Awards:

SYSPRO is one of the world's most industry-acclaimed software companies. Recent achievements include:

- 2006 Ranked No. 1 for Customer Satisfaction (CA Magazines 2nd Annual User Survey of Mid-market Accounting and ERP Systems).
- "2005 Hot Company." This latest honour marks the sixth year in succession that SYSPRO has received recognition from the publication as one of the "hottest" companies in the industry. (Start Magazine)
- 2004 Software Company of the Year (Software Council of Southern California)
- SME Software of the Year, 2002, 2003, 2004 (K2 Enterprises Annual Reseller/Consultants Accounting Software Survey)
- Highest Ratings in Accounting and Manufacturing Software Reviews by CPA Software News for 10 consecutive years
- K2 Quality Award for "Installation Channel/Methodology"

Ranked among the World's Top Software Companies by iSource Magazine; MSI Magazine (1995 through 2003) and Software Magazine (2003 and 2004); and Highest Ratings in Accounting and Manufacturing Software Reviews by CPA Software News/CPA Technology Advisor for ten consecutive years.

SYSPRO e.net Solutions

Platforms and Hardware Requirements:

- SYSPRO's software architecture is based on several technologies, including Microsoft® .NET and COM (Component Object Model), XML (Extensible Markup Language) and Microsoft® SQL Server – and runs with equal strength on a variety of operating systems and hardware platforms; including Windows and UNIX servers with Windows clients.
- SYSPRO is committed to the latest client/ server technology in Windows XP/NT/2000, UNIX and Linux environments.

Implementation:

A structured approach has been developed to help reduce the time and cost of implementing SYSPRO. This proven methodology encourages responsibility and accountability and promotes action to help management keep budgets and timescales on track.

In 2002, SYSPRO was awarded the annual K2 Quality Award for "Installation Channel/Methodology".

Modularity:

The modular nature of SYSPRO's multi-platform software provides scalability and flexibility and allows an enterprise to select only those functions needed to increase operational control and efficiency. SYSPRO is optimised for use in a variety of operating environments, including Microsoft Windows, Microsoft SQL Server, UNIX and Linux.

Leveraging Key Technologies:

SYSPRO's ongoing product development is focused on establishing and maintaining strategic business partnerships and leveraging key technologies such as XML (Extensible Markup Language), Microsoft .NET and COM (Component Object Model).

Cross-System Communication:

SYSPRO e.net solutions, including the Document Flow Manager and EDI (Electronic Data Interchange), facilitate transaction and communication between disparate systems.

SYSPRO Quick Facts:

- 25 years of experience in manufacturing software.
- SYSPRO software is used by over 12,000 licensed companies in more than 60 countries ranging from small, single user installs, to large installations with over 500 users.
- One of the most widely used ERP solutions within the small-to-medium enterprise marketplace today.
- SYSPRO remains an independent, privately-held company in order to focus on meeting client needs.
- Winner of numerous industry awards, and recipient of top-level ratings from consulting firms, industry analysts and research houses for outstanding product, technology and service.
- SYSPRO operates out of five continents with offices in Africa, Australia, Canada, the United Kingdom and the United States of America – together with 1500 channel partners across 60 countries.
