

Answer Details

What are the LAKEVIEW and MIMIXOWN user profile authority and password requirements?

Answer ID 17168

Applicable Products

MIMIX Enterprise 8.0, 7.1, 7.0, 6.0, 5.0, 4.4

MIMIX Global 8.0, 7.1, 7.0

MIMIX Professional 8.0, 7.1, 7.0, 6.0, 5.0, 4.4

Description

Symptoms:

What are the LAKEVIEW and MIMIXOWN user profile authority and password requirements?

Environment:

Actions Taken:

Additional Info:

Answer

The MIMIXOWN user profile is created with an initial menu of *SIGNOFF so that it cannot be used to sign on to the system, as well as a preset password so that it is consistent on all systems. The MIMIXOWN password can be changed if necessary. If you have a need to change the MIMIXOWN preset password refer to [Answer 3546](#). The MIMIXOWN user profile owns all of the objects in the MIMIX library and has access to all the objects that make up each of the MIMIX products. All processes for MIMIX products run under the MIMIXOWN user profile. The MIMIXOWN user profile is created by default as a security officer class (*SECOFR) user profile with all special authorities, including all object authority (*ALLOBJ). The MIMIXOWN user profile needs this level of authority to access information needed for MIMIX products to perform their operations. The MIMIXOWN system directory entry is required for DLO replication and should not be removed.

The LAKEVIEW user profile is created with an initial menu of *SIGNOFF so that it cannot be used to sign on to the system. The LAKEVIEW user profile owns all of the objects in the LAKEVIEW and MIMIXQGPL libraries and has access to all the objects that make up the License Manager product. The LAKEVIEW user profile is created by default as a programmer class (*PGMR) user profile with selected special authorities, including all object authority (*ALLOBJ). The password for the LAKEVIEW user profile can be changed and does not need to be the same on all systems.

The security requirements for user profiles LAKEVIEW and MIMIXOWN are described in:

"CHAPTER 6 - General security considerations" under the headings 'Security for MIMIXOWN and MIMIXCLU user profiles' and 'Security for LAKEVIEW user profile' in the [Using License Manager - V8](#) manual.

"CHAPTER 6 - General security considerations" under the headings 'Security for MIMIXOWN and MIMIXCLU user profiles' and 'Security for LAKEVIEW user profile' in the [Using License Manager - V7.1](#) manual.

"CHAPTER 5 - General security considerations" under the headings 'Security for MIMIXOWN and MIMIXCLU user profiles' and 'Security for LAKEVIEW user profile' in the [Using License Manager - V7](#) manual.

"CHAPTER 5 - General security considerations" under the headings 'Security for MIMIXOWN user profile' and 'Security for LAKEVIEW user profile' in the [License and Availability Manager - V6](#) and [License and Availability Manager - V5](#) manuals.
